

Forming a Research Question

Research Methods

Overview

How to narrow a broad topic into a focused, answerable research question.

Learning objectives

- Explain the key ideas introduced in this module in your own words.
- Apply the concepts to a small, practical example.
- Prepare for the related course assignment using what you learned.

Placeholder module file — replace this PDF with the actual module material. Keep the file name the same, or update the path in modules-data.js.

Key topics

This second page exists so you can see how multi-page PDFs scroll inside the module window.
Replace it along with the rest of this file.

Study notes

Use this space for reading notes, examples, and review questions in the real module.
